PROFESSIONAL SUMMARY

- DevOps Engineer with 2+ years of experience architecting scalable AWS solutions (EC2, S3, VPC) and optimizing CI/CD pipelines. Achieved 40% faster deployments through Jenkins/GitHub Actions optimization and 30% cost reduction via infrastructure automation (Terraform/Ansible). Security-focused practitioner (OWASP, Nessus) with additional expertise in mobile development (Flutter).

EXPERIENCE

• Algebra Systems

January 2024 – March 2025

DevOps Engineer

Tunis, Tunisia

- Reduced CI/CD pipeline execution time by 40% (from 15min to 9min) by optimizing Jenkins workflows and parallelizing GitHub Actions jobs
- Designed and managed scalable AWS cloud infrastructure, enhancing reliability and cost-efficiency.
- Automated provisioning and deployment with Ansible, Terraform, and Bash, reducing errors and saving time.
- Improved application security by identifying 50 vulnerabilities early using OWASP ZAP, reducing patching time by 30%.
- Integrated monitoring tools (Prometheus, Grafana, Zabbix, CloudWatch) for proactive issue detection and performance optimization.
- Managed version control and code quality with Git, SonarQube, and agile branching strategies.
- Implemented backup and disaster recovery strategies to ensure business continuity and minimize downtime.

• Algebra Systems

September 2022 – December 2023

Mobile Application Developer

Tunis, Tunisia

- Developed a real-time chat feature with push notifications to enhance user communication.
- Enhanced the dashboard system to enable users to visualize and monitor critical mortgage-related data in real-time.
- Contributed to the development of an event signature module to streamline the scheduling and management of mortgage signing appointments.
- Deployed the application successfully to both the Apple App Store and Google Play Store, ensuring wide user reach and platform compatibility.

• TPLUS

October 2021 – September 2022

Mobile Application Freelancer

Paris, France

- Contributed to various development projects, including a comprehensive school management application and a medication management system tailored for pharmacies, enhancing operational efficiency and user experience.

• Tunis Stock Exchange

February 2022 – June 2022

Intern - End of study project

Tunis, Tunisia

- Developed a stock market data broadcaster using WebSockets and UDP for real-time, low-latency data transmission on a high-performance Linux platform.

• Progress Engineering

July 2021 – August 2021

Internship

Tunis, Tunisia

- Developed a fully functional email client using SMTP, IMAP, Java, and JavaFX, enabling users to send, receive, and manage emails through an intuitive desktop interface.

• Tunisia Telecom

January 2020 – February 2020

Internship

Tunis, Tunisia

- Installed new subscriber connections and deployed fiber optic lines while analyzing and assessing various network architectures to ensure optimal performance and reliable connectivity.

EDUCATION

• Hochschule Schmalkalden

Study Abroad Program in Computer Science

April 2025 - Present

Schmalkalden, Germany

• TEK-UP University

Engineering Degree in Computer Science

September 2022 - November 2025 (Expected)

Tunis, Tunisia

• ISET'COM University

Bachelor's degree in information and communication science and technology, Network Security

September 2019 - August 2022

Tunis, Tunisia

PERSONAL PROJECTS

- **Automated EC2 Static Website Deployment:** Set up and hosted a static website on multiple EC2 instances using Ansible, with secure SSH communication for streamlined deployment and configuration.
- **User Authentication with Keycloak and Azure AD:** Integrated Keycloak and Azure AD for secure user authentication and access control.
- **CI/CD Pipeline for APK Build and Nexus :** Developed a CI/CD pipeline that builds an APK and stores it in a Nexus repository, automating the process to streamline Android app delivery and version management.
- **AI-Powered Learning App for Kids:** Developed a mobile application using artificial intelligence (AI) and TensorFlow Lite to accurately recognize fruits, animals, objects, and superheroes, designed to provide an engaging and educational experience for children through visual learning.

TECHNICAL SKILLS

Cloud & DevOps

AWS (EC2, S3, Route 53, IAM, CloudFormation), Terraform, Ansible, Kubernetes, Docker, Jenkins, GitHub Actions

Security & Compliance

OWASP ZAP, Fortify, Acunetix, Nessus

Monitoring & Observability

Prometheus, Grafana, CloudWatch, Zabbix, ELK Stack

Networking & Infrastructure

TCP/IP, DNS, HTTP/HTTPS, VPN, AWS VPC, Load Balancers (ALB/NLB), Wireshark, Nmap, Cisco Basics

Programming & Scripting

Python, Java, Dart (Flutter), JavaScript, Bash

Databases & Storage

MySQL, PostgreSQL, MongoDB, RDS, S3

LANGUAGES

- * **Arabic:** Native
- * **English:** B2(Upper-Intermediate)
- * **French:** B2(Upper-Intermediate)
- * **German:** A2(Elementary)

CERTIFICATIONS

- * **Certified Kubernetes Application Developer (CKAD) | Expected 2025**
- * **Terraform Associate (003)**
- * **CCNA 1 , 2 and 3**
